

Risk Services

AdviseSense has one of the largest teams of specialized insurance consultants on the market. Our mission is to deliver tailor-made dependable, innovative, and practical sustainable risk management solutions with a strong focus on customer and business value, while ensuring compliance with both external and internal regulations. Our expertise primarily serves insurance companies, insurance intermediaries, occupational pension associations, pension foundations, and captive insurance companies.

Example of services

- Outsourcing and Co-Sourcing of Risk Functions**
 Flexible solutions to support or manage risk operations on an outsourced or collaborative basis.
- Interim Risk Resources (1st and 2nd Line)**
 Temporary risk expertise to address organizational needs during transitions or periods of change.
- Expert Support in Risk Activities**
 Expert assistance to strengthen risk functions and navigate complex regulatory challenges in both 1st and 2nd line activities.
- Captive Insurance**
 Outsourced risk function solutions tailored for captive insurance companies, including interim CEO services.
- Incident Management and Risk Training and Advisory**
 Establishing incident reporting processes. Tailored training programs and ongoing advisory services for Boards, management, and operational teams.
- Risk Framework Development and Implementation**
 Designing and integrating internal risk frameworks to ensure regulatory compliance and operational efficiency.
- GAP Analysis and Due Diligence**
 Identification of risk gaps and ensure alignment with regulatory frameworks and requirements.
- Regulatory Monitoring and Reporting**
 Monitoring regulatory developments, assessing their impact, and ensuring compliance through reporting and implementation.
- Sustainability Risk Management**
 Practical guidance on sustainability risk integration, strategy development, regulatory compliance, and reporting.
- ORSA and Stress Testing**
 Support in executing ORSA processes, including scenario analysis, stress testing, and risk impact evaluation.
- Liquidity Risk Management**
 Implementation and review of liquidity risk management, including cash flow stress testing and liquidity planning.
- ICT Risk Management**
 Assessment, mitigation, and monitoring of ICT risks. Development of resilience strategies and ICT risk governance frameworks.
